BIOGRAPHY

My name is Abdulrahman Abulail, a computer science student at An-Najah National University (almost graduating).

As an aspiring software developer, I am eager to apply my skills in a dynamic professional environment. My goal is to gain valuable experience, enhance my expertise, and contribute meaningfully to a team, fostering both personal and career growth in the business sector.

EDUCATION

High School, Burqa secondary school

September 2020 - June 2021

score: 83.7

An-Najah National Univ., Nablus — Bachelor's

September 2021 - January 2025 (expected)

Majoring in Computer Science

TRAINING

Full Stack development

2021 - Udemy, pluralsight and self learning

Flutter, Front end development

2022 - 2023 - Freelancing, and self learning

CAREER OBJECTIVES

As a Computer Science student, I aim to gain valuable experience at top tech companies and become an active freelancer at the same time. My goal is to improve my technical skills in areas like web and mobile development.

I want to join a dynamic team where I can use what I've learned and contribute to exciting projects. My aim is to become a well-rounded professional in computer science, have my own business managing tech projects and make a difference in the industry.

SKILLS

Problem Solving
Works in a team
Object Oriented
Programming

PROJECTS

Criminal Document System — *Web application*

A full stack web application utilizing PHP, HTML, CSS, JQuery and Bootstrap framework technology stack. Aims to provide a document management system for the local police department, and a criminal profile search engine.

Student Collaboration Application — *Web and mobile applications*

A startup project utilizing the microservices architecture. A web application to help students collaborate and be active in different communities. It is an ongoing project, and is managed and developed by a team of developers.
